

Zengjun Guo

School of Urban Planning and Design,
Peking University, China.

Website: zengjunguo.github.io

Email: zengjunguo@stu.pku.edu.cn

Phone: +86 151 6656 9988

Research Interests

- **Urban Resilience & Disaster Risk Reduction:** resilience assessment of critical infrastructure systems and their interactions with human responses under compound hazards.
- **Climate Risk Modeling & Adaptation:** probabilistic simulation of climate extremes and scenario-based projections of their impacts across regions and sectors.
- **Urban Analytics & GeoAI:** large-scale spatiotemporal data and geospatial machine learning to characterize human mobility and network dynamics during disasters.

Education

Peking University, China

Sep 2024–Present

M.Sc. in Territorial Spatial Planning

GPA: 3.84/4.0

Nankai University, China

Sep 2020–Jun 2024

B.Mgmt. in Urban Management

GPA: 3.85/4.0 (ranked 1st)

University of Glasgow, UK

Sep 2022–Jun 2023

Exchange Student in Urban Studies

GPA: 18.3/22.0 (First-Class)

Research Experience

School of Urban Planning and Design, Shenzhen Graduate School, Peking University

Graduate Researcher

Shenzhen, China / Sep 2024–Present

Advisor: Dr. Junqing Tang

- Generated synthetic commuting OD matrices with GLODGen and tropical cyclone tracks from CMIP6 forcing; coupled C15–TCR wind–rain modeling, asset valuation, and network assignment to assess global urban road damage and mobility disruption.
- Assessed healthcare supply mismatches in 52 Chinese coastal cities: 15.574 million older adults exposed annually and CNY 1.829 billion cumulative potential hospital asset losses (2015–2024); under SSP5-8.5, projected expected annual losses at 2.36 times the present-climate baseline and 19.7–32.8% climate amplification of aging-driven exposure growth.
- Reconstructed Mangkhut’s wind–rain evolution with ER11 and GMCP and processed 2.5 billion mobile-phone records to reveal coast–inland resilience gaps and future inland vulnerability shifts.

Key Laboratory of Earth Surface System and Human-Earth Relations (MNR)

Research Group Member

Shenzhen, China / Oct 2023–Present

Advisors: Dr. Junqing Tang and Prof. Pengjun Zhao

- Proposed a human–environment–disaster coupling theory and the marginal constraint effect, framing disaster risk as an endogenous constraint; examined the 2021 Zhengzhou “7 · 20” flood.
- Mapped flood-induced shelter demand–supply mismatches across 21 cities with GHS-SMOD and developed an interactive spatial decision system for targeted emergency resource allocation.
- Refined DBN–ARIMA for nine Pearl River Delta cities: identified four 2015–2021 resilience trajectories and projected a wider Guangzhou–Shenzhen-centered core–periphery gap by 2026.

Conference Presentations

1. “The Geographic Connotation of Resilient-City Research: An Exploration of Disaster-Risk-Constrained Human–Earth Relationships.” Oral presentation at the 13th International Conference on Population Geographies (ICPG), Nanjing, China, Jun 2026.
2. “Human–Environment Relationships under Disaster-Risk Constraints: A Preliminary Theoretical Exploration of the Geographic Connotation of Resilient-City Research.” Oral presentation at the 2026 Spring Annual Meeting of the Geographical Society of China, Chongqing, China, Apr 2026.

Academic Service

1. Committee Member, Sub-Society for Postgraduate Students, Geographical Society of China, 2025–Present.

Honors & Awards

1. 2026 First Prize, 10th Chengyuan Cup Planning Decision Support Model Design Competition.
2. 2025, 2026 Second Prize, Peking University Academic Science & Technology Competition.
3. 2025 Third Prize, Esri Cup China University GIS Software Development Contest.
4. 2024 National Second Prize, Undergraduate Innovation & Entrepreneurship Training Program.
5. 2024 Outstanding Undergraduate Thesis, Nankai University.
6. 2024 Outstanding Graduate, Nankai University.
7. 2024 Huadan Scholarship in Political Science, Nankai University.
8. 2021, 2023 First-Class Scholarship, Nankai University.
9. 2022 Tianjin Municipal Government Scholarship, Tianjin Municipal Education Commission.

Technical Skills

Programming & web development: Python (NumPy, pandas, GeoPandas, Rasterio, xarray, scikit-learn); JavaScript; HTML/CSS.

GIS & modeling software: ArcGIS; GeoScene Pro; QGIS; CLIMADA; GeNIe Modeler.

Development & typesetting: Git/GitHub; LaTeX.
